My Ride K-12 > With ETA to Stop

Dear Parents/Guardians,

Your school district is introducing My Ride K-12, a parent communication app, to its transportation operations. My Ride K-12 is a one-of-a-kind mobile app integrated with your district's student transportation software that allows both you and your student to access estimated times of arrival or departure for your bus. This helps ensure that you and your student are on time for pick-ups and drop-offs while making the bus route more efficient.
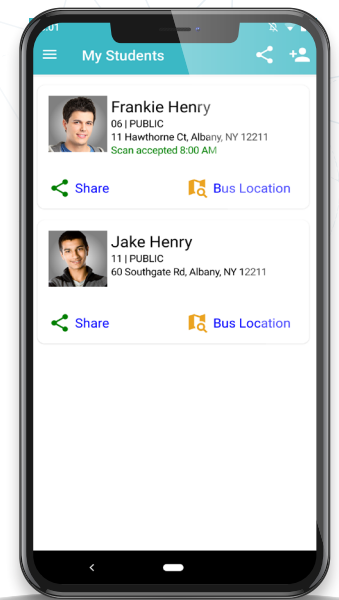

Updates Are Just a Few Clicks Away

My Ride K-12 is designed so you can access your student's bus schedules efficiently. GPS technology on the bus works with the district's software to automatically calculate the timing of a bus route to give you the most accurate ETAs with real-time updates. No more calls to your school are needed for updates. Information can now be accessed at the touch of a button. Your students may also access the app if they have a mobile device.

Sign up for push notifications to be automatically notified about changes in your student's bus arrival, and to prevent you from having to frequently check the My Ride K-12 app for ETAs.

Getting Started with My Ride K-12

My Ride K-12 is now available for you to download on your Apple or Android mobile device. Simply search the app store for "My Ride K-12" to download and register yourself on the app. Please ensure that you change your password upon initially logging in, as this will help ensure secure login and user management moving forward.
